T1 - Professional Headset Telephone for Small Businesses and Call Centers. (Headset Included)

# T1 Headset Telephone Kit

HEADSET TELEPHONE COMPLETE SOLUTION.

Accutone® is proud to introduce the simplest headset solution for small offices and call centers - the T1 Headset Telephone Kit. Basically a telephone terminal designed to pair with a headset instead of a handset, the T1 telephone is both elegant and functional. Aside from the basic 12-keys dialpad, the T1 offers Flash, Pause and Redial keys, Ring-tone Selection, Volume Control, Mute and other standard telephone features.

T1 is compatible with any Accutone® telephone headset, which is considered one of the most powerful and reliable product by the call center industry. Equipped with speech-enhanced receiver and noise-cancelling microphone, Accutone's telephone headset when used in combination with the T1 telephone will greatly improve the quality of your telephone conversation, on top of simple handsfree convenience.

T1 telephone is directly connected to any standard PSTN wall-jack.
